

Day 8 Journal Entry

Senuk Wijesinghe

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

Prompt option 1: *What have you learned about yourself and what you want in a career?*

Because of this internship, I have found that I really want to get into software development. I love the open source culture behind RedHat and working here would be a dream for me. I have also found that it might not be as difficult of a goal as I previously thought. I have learned that I really enjoy the environment here and how everyone works together. I also learned that some job positions here that I previously didn't consider, like UX Design, are actually really cool and if the software dev route doesn't work, I could work in a different area.
