

Day 4 journal entry

[Dhisha Kumar]

Choose 1 of the following prompts to respond to and then delete the prompt(s) that you did not choose.

Prompt option 1: *What is a topic that you found interesting this week? How do you plan to seek additional information and learn more about that topic?*

One topic I found interesting this week was the company's involvement in AI. The seminar with Sherard Griffin was very informational and I learned more about different careers that work with AI and help develop it. My plan to seek additional help is by asking Mary to set a meeting with somebody who works and uses AI in their day to day job. My hope is to shadow this person and learn more about how to use AI to increase productivity. I will also continue to do my own research about how AI has started to be incorporated into other companies and do some work with developing some things on my own using AI.

Prompt option 2: *Discuss your interactions with various people during your internship and the value each relationship brings (peer interns, college mentor, session speakers, higher-level leaders).*

Add your response here

Prompt option 3: *What are your main takeaways from this first half of your internship and how do you plan to carry those lessons into your second week?*

My main takeaway from my first half of my internship was learning about the different roles people have at Red Hat and meeting new people who work in various fields. My plan is to connect with some of the people I have already met and ask them more questions about their career. While I meet with these people I hope to learn more about what their day looks like working at Red Hat.

Export + contribute your reflection

1. Once you've filled out the above prompts, export this doc as a PDF. Note: make sure you rename the file to be in the format **[Firstname Lastname] Day 4 Journal Entry**

2. Now that you have a PDF of this week's reflections saved locally to your laptop, you should contribute the PDF to your personal GitHub dropbox area in [our shared repo](#). Use the '[Journal entry contribution cheat sheet here](#)' to assist you and ask a GitHub coach for help if you need it!
